RE: Price Increase Letter – Fuel Price Impacts

To Our Valued Customers,

We truly appreciate your continued support and the trust you place in our services. We remain committed to delivering the reliable and high-quality products & services you expect from Wagners.

Recent fuel price increases are having a considerable impact on raw materials and delivery costs. While we have absorbed the increases from the past few weeks in a hope that they would stabilise, this has not eventuated and Wagners will be implementing a price increase from Tuesday 29th September.

To enable some transparency, we have undertaken a review of direct costs and structured the fuel surcharge price increase in bands as per below:

Fuel Price- AIP regional avg. (\$/L)	2.41-2.60	2.61-2.80	2.81-3.00	3.01-3.20	3.21-3.40
Fuel levy applied per m ³ (\$)	6.02	9.00	11.85	14.49	17.14
Additional levy for exposed aggregate mixes (\$)	4.24	6.50	9.18	11.85	14.53
Cartage rate m ³ /km for deliveries >15km (\$)	2.12	2.30	2.42	2.52	2.62

The increase is based on the Australian Institute of Petroleum's Queensland Regional Average which can be found online:

<https://aip.com.au/pricing/diesel/queensland-retail-diesel-fuel-prices/queensland-regional-average/>

The fuel surcharge will be reviewed on a fortnightly basis & adjusted on AIP average rates. Any drastic corrections in the market rate will be communicated separately as required.

Wagners appreciates your support and understanding. For any further information or any clarification required, please contact your Sales Representative.

Regards,

Wagners Concrete
