CORPORATE ENVIRONMENTAL POLICY

Wagners recognizes and accepts that proper care of the environment is a fundamental part of its corporate business strategy and concerns for the environment must be integrated into all management programs. Good health and safety and environmental performance is critical to the success of our business.

The Group is committed to:

- ▶ Fostering openness and dialogue with employees and the public, anticipating and responding to their concerns regarding the potential hazards and impact of the groups operation, products, waste or services.
- ▶ Implementing management strategies to meet current and anticipated performance standards in regularly reviewing objectives in light of changing needs and expectations.
- ▶ Avoiding the pollution of land, water and air by strict adherence to license conditions, regulations and industry codes.
- ▶ The reduction of waste and the consumption of resources and where feasible, the recovery of recycling of waste rather than disposal.
- ▶ To give health, safety and environmental considerations priority in our equipment designs and planning for new products or process.
- ▶ To ensuring all employees and contractors are aware of their environmental responsibility through induction programs.
- ▶ Ensuring our environmental policy and information relating to the group's activities are freely available to the public and other interested parties.

The Wagner Group of Companies believes that we must conduct our business in an environmentally responsible manner that leaves the environment healthy and safe and does not compromise the ability of future generations to sustain their needs.

A handwritten signature in blue ink that reads "Denis Wagner".
