Wagners have built composite structures for use in the sweltering tropics and burning deserts to sub-zero temperatures. Wagners composite structures are uniquely suited to withstand the harshest environments while providing a low maintenance, long-life asset for the local community.

The unique durability and strength of a Wagners structure is perfect for coastal, marine and environmentally sensitive areas. Assembled in a controlled environment with precise tolerances and attention to detail, Wagners build a superior product. Possessing a full in-house design team, Wagners work closely with the client to ensure a robust, aesthetically pleasing pedestrian asset that will provide decades of service.

**PERFORMANCE ADVANTAGES**

- Quick and easy installation (modularised design)
- Prefabrication and scheduled works delivery
- Lightweight
- Termite proof
- Resistant to acid sulphate soils
- Dispensable cathodic protection
- Inert, environmentally stable material

**WAGNERS COMPOSITE PRODUCTS WILL NOT RUST, ROT OR CORRODE ENSURING A LOW MAINTENANCE ASSET WITH A LONG LIFE SPAN.**

Design

- Designed for Australian Codes and Australian conditions
- Can incorporate disability requirements
- Standard 5kPa pedestrian load with 1-4t. service vehicle dependant on decking selection
- Girder bridge: 6 - 11 m span
- Light (riveted) truss bridge: 10 - 18 m span
- Heavy (bolted) truss bridge: 10 - 40 m span

Supply and Installation

- Pre-drilled to client specifications
- On-site support
- Lightweight material allows for a smooth and effective construction

Lifespan and Warranty

- Consistent properties, engineered material with well understood characteristics
- Colour-fast: Durability rating as ‘extra long term’
- Seven years full replacement warranty

Wagners can provide on-site support for installation.
