

TRANSPORT

Wagners Transport is committed to providing high level customer service and consistently reliable performance. Wagners Transport has the capability to supply transportation and logistic solutions in all States of mainland Australia utilising modern vehicles and highly trained drivers.

Wagners has a large fleet of modern vehicles ranging from body trucks to quad trailer road trains providing operational solutions for any transport project including:

- Concrete agitators
- Single and multi trailer combinations including body and dog, side tippers, flat top and bulk pressure cement tanker configurations
- Heavy haulage capabilities using tri axle drop deck trailers, tri axle and quad floats and dolly combinations.

Included in the fleet are quick release vehicles which can be utilised for concrete, quarrying and transport contracts in varying configurations dependent upon job type and client requirements.

Wagners Transport is NHVAS accredited and a member of the Mass Management and Maintenance Program. All drivers with ongoing training are encouraged to develop and heighten their knowledge and awareness of the industry. The company's full time accredited Driver Trainers provide continual updates to drivers and ensure that they receive training in best practice operational processes and current legislative requirements.

Wagners Head Office in Toowoomba boasts a modern workshop facility which has the capacity to service the mechanical needs of the company's fleet. The facility is made up of several sections including a heavy vehicle maintenance section which is used for maintenance and overhaul of the fleet of trucks and earthmoving equipment.
