

# COMPOSITE BOARD WALKS

# WILL NOT ROT, RUST OR CORRODE

**WAGNERS**

*Australian owned,  
developed and operated*

FLYASH | CEMENT | TRANSPORT | CONTRACT CRUSHING, HAULAGE & SCREENING | MOBILE CONCRETE | PRECAST CONCRETE | EARTH FRIENDLY CONCRETE | COMPOSITE FIBRE TECHNOLOGIES | REINFORCING STEEL | PROJECT SERVICES

Wagners innovative boardwalk design allows composite structural members to be integrated with any type of pier, decking or handrail systems, including timber or steel. Composite boardwalk structures are easily assembled from fibre reinforced polymer (FRP) systems manufactured from FRP pultrusion structural shapes and composite sections.

Wagners CFT now offer composite structural components for boardwalk projects including: footbridges, decks, cycle ways and jetty applications.

**Innovative Qualities:**

- Excellent corrosion resistant properties – will never rot or rust
- Aesthetically pleasing and available in a range of colour options
- Lightweight
- Fast, simple and low cost installation
- Can be easily prefabricated
- Lifespan exceeds that of conventional materials
- Suitable for all environments
- Maintenance free, no high wear components
