

WAGNERS

Composite Fibre Technologies (CFT)

WATER TANK COLUMNS

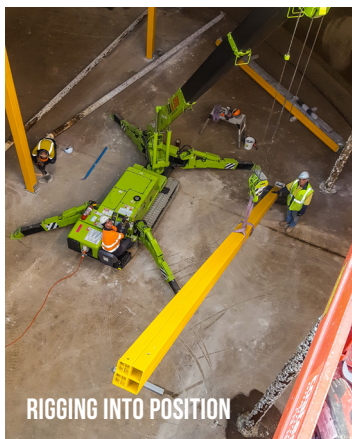

WAGNERS COMPOSITE STRUCTURAL COLUMNS

CORROSION-FREE LIGHTWEIGHT AND STRUCTURAL

WE MANUFACTURE WATER TANK COLUMNS FOR THE WATER OR SEWER INDUSTRY.

Wagner's Composite Fibre Technologies (CFT) has pioneered the use of composite materials around the world, is credited with the design, and local Australian manufacture.

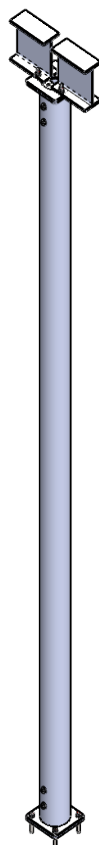

Our composite fibre technologies products are perfect for environmentally sensitive areas as they are strong, durable, and corrosion resistant.

RIGGING INTO POSITION

PULTRUSION MACHINE IN ACTION IN FACTORY

FEATURES

- » Resistant to rust, rot, carbonation, chlorides, corrosion, and industrial chemicals
- » Lightweight
- » Inert, environmentally stable material
- » Manufactured locally in full lengths in Australia – For quick turnaround and Quality ISO 9001
- » With a design life expectancy of 100 years
- » There are no joints and the columns can be cut to the desired lengths in the factory or oversized to be cut on the site (minimal waste)

PERFORMANCE ADVANTAGES

- » Safe for workers to install with minimal crange - Quick, light and easy
- » Cost effective and economical
- » Potable water tested and approved to "AS/NZs 4020:2005"
- » Engineered and Certified
- » Tested in Australia

Details / Drawings / Designs / Connections and Testing are readily available.
